## **Usage Tips for Optimal Performance**

The mCable™ performs at its best when your DVD player or streaming device provides the original video without extra processing or scaling by the player or streaming device. See the tips below to maximize your viewing experience with the mCable.

### **DVD Players**

- When playing a standard DVD disc (480p), on a standard DVD player, set the output resolution of the DVD player to 480p.
- When playing a Blu-ray Disc on a Blu-ray DVD player, set the output resolution to 1080p and make sure that 24p output is enabled in the setup menu. Disable 4K output if this option is available.
- When playing a standard definition DVD on a Blu-ray change the DVD player's output resolution to 480p. Remember to change it back to 1080p when playing Blu-ray discs.

### **Cable Boxes, DVR's, Streaming Boxes**

- For most source devices that do not include content upscaling features the mCable is a simple 'plug-in and play' operation.
- Please visit [www.marseilleproducts.com](http://www.marseilleproducts.com) for detailed information on any settings that may need to be adjusted on your specific source device and/or HDTV to maximize the effectiveness of the Marseille cable.
